Ringkasan

Senior Back-End Developer with 5+ years of experience designing and building scalable, high-performance systems using Go, Java, Python, Node.js, and PHP. Strong expertise in database design, query optimization, and performance tuning across SQL and NoSQL systems. Experienced with Laravel, Yii2, Spring Boot, Flask, and Express.js. Proficient in RESTful API development, distributed systems, Redis, RabbitMQ, Docker, and Git. Leverages AI-powered tools to accelerate development, automate tasks, and improve code quality. Also capable of working with React.js, with a primary focus on back-end engineering.

Riwayat karier

Senior Backend Developer di PT.Wide Technologies Indonesia

Des 2024 - Saat ini (1 tahun 7 bulan)

- Designed and developed a nationwide EDC tracking system and scalable ticketing platform for service & maintenance, enabling real-time monitoring and automated job assignment for field technicians.
- Architected and maintained microservices-based backend systems using Java (Spring Boot, Spring MVC) with high scalability, modularity, and availability.
- Built and standardized RESTful APIs, and integrated with external banking systems (BRI, BNI, Mandiri, etc.) using secure communication and data synchronization mechanisms
- Implemented event-driven architecture using RabbitMQ and leveraged Redis caching to optimize asynchronous processing, improve performance, and reduce database load.
- Designed and optimized PostgreSQL databases (including partitioning, indexing, and query tuning) to efficiently handle millions of high-volume transactional records with improved query performance and scalability.
- Led performance optimization, monitoring, and CI/CD practices, while applying clean code principles, SOLID design patterns, and collaborating in Agile teams to deliver high-quality systems.

Full-StackDeveloper di PT.Humanindo Amana Properti

Des 2023 - Des 2024 (1 tahun 1 bulan)

- Developed and maintained sales and marketing apps with CRM and marketing tools, along with a Super App for property management featuring payment gateways, booking, and tenant management on Android, iOS, and Web.

- Utilized Spring Boot, Express, Yii2, React.js, along with technologies such as Redis, RabbitMQ, and SQL.
- Managed servers using Jenkins, VPS, and SSH.
- Collaborated with teams using GIT, Trello, and Lark.
